

Summer Internships at LivelyHood.io

LivelyHood is an early stage COVID-relief startup founded in Cambridge, MA.

We offer a safe and simple platform that connects healthy, young volunteers with elderly and immunocompromised individuals who need help running errands. Our mission is to help diminish the impact of the pandemic by enabling the most vulnerable among us to stay safe in their homes.

The idea is simple. Volunteers are pinged if a neighbor is in need of groceries or a prescription, and they pick those things up the next time they're making a trip out of the house. Volunteers then follow a "no contact" delivery protocol. We recently launched our site and are looking for summer interns to help us grow and scale.

Open Internship Roles

- **Growth Marketing** (developing go-to-market strategy, setting growth KPIs, drafting paid marketing proposal, managing social media)
- **Product Operations** (leading our automated Boston operations, developing standard operating procedures, supporting delivery success)
- **Generalist Full-Stack Software Engineer** (opportunities to work on our site in Python 3, jQuery, JavaScript, Django, Postgres, Celery, Twilio, based on Heroku)

About You

- Passionate about making a difference during the global COVID-19 pandemic
- Desire the excitement of working at an early stage venture
- Enjoy working in fast-paced environments with significant autonomy
- Excel at both "on the ground" work and high-level strategic problem solving
- Handle change well -- in fact, you thrive in it

Logistics

- Application deadline is Friday, May 29th at 11:59pm Eastern
- Please submit resumes with a brief introduction to LivelyHood.io@gmail.com
- Internship is unpaid, and we encourage university-sponsored grants / fellowships
- Internship is remote / virtual
